+ MY EXPERIENCE

Something about my major

I registered and accomplished many online codding-course in Udemy and F8, this make my codding-skill better.
During this time, I learnt some programming languages as C/C++, C#, Python, Java...basically. Specially, I really interested in front-end aspect. At university, I and my friends has gathered together and created a team and we have finished some app project ourselves. This help me a lot because I have learnt many things include codding-skill, teamwork-skill, handle progress smoothly. All of our project are written in HTML, CSS, SCSS, JS, Bootstrap 5, MUI 5, Redux tookit, ReactJS, e...

**My Projects
↓**
+ MOVIE PREVIEW WEBSITE

Use the API to build a movie preview online website

Github: https://github.com/nxuanthanh/react-movies-app
Link: https://vercel.com/nxuanthanh/react-movies-app

Number of members: 01(personal self-study project)

Technology:: HTML,CSS(SCSS), Javascript, ReactJS, Axios, Swiper, React-router v6

Main feature: Keep up to date with details of movies that have been and are coming soon, watch the trailer

+ WOMEN'S FASHION STORE

Github: https://github.com/nxuanthanh/ecommercet-store
Link: https://ecommercet-store.vercel.app/

Number of members: 01(personal self-study project)

Technology: HTML,CSS(SCSS), Javascript, ReactJS, Redux-toolkit, React-router v6

Main feature: view product information, filter by color, filter by size, filter by type, purchase, add to cart

OBJECTIVE

Applying the Frontend skills that I have learned to apply in practical work, bringing technological solutions and useful values to the company. At the same time, I want to improve my professional qualifications and professional competence through the professional working environment of the company.

SKILLS

HTML,CSS(SCSS), Bootstrap 5, MUI

Javascript, Typescript, Java

ReactJS, Redux, Redux Toolkit

React-hook-form, Yub, Firebase

Jest, Postman, Git,

English: Read and Understand the documents well.

+ T-SHOP

Use the API to build a sales website
Github: https://github.com/nxuanthanh/t-shop
Link: https://t-shop-ruddy.vercel.app/products

Number of members: 01(personal self-study project)

Technology: HTML,CSS(SCSS), Javascript, ReactJS, MUI, Axios, React-form-hook, Redux, Redux toolkit, React-router v6, notistack

Main feature: Log in, log out, view product information, filter by price range, filter by shipping method, filter by product type and filter by coupon code, add or remove products from cart, calculate number of products, price.
